

Doghouses

Imagine groups of two black keys are a doghouse. Dogs live in doghouses so the white key in the middle is D. Use the music alphabet to determine the names of the other two white keys around the group of two black keys.

1. Circle the remaining groups of two black keys.
2. Label all the D piano keys
3. Label all the C and E piano keys
4. Play all CDE piano keys on your piano

Garages

Imagine groups of three black keys are a garage where you can park two cars. The first two letters of garage are GA; these are the names of the two white keys in the middle of the group of three black keys. Use the music alphabet to determine the names of the white keys on either side of the garage.

1. Circle the remaining groups of three black keys.
2. Label all the GA piano keys
3. Label all the F and B piano keys
4. Play all FGAB piano keys on your piano
